

## Mississippi Small Domestic NPDES Application – Testing Page

Existing dischargers – Please provide one analysis for each parameter on the following table. You must collect and analyze samples in accordance to 40 CFR 136. The testing below may be waived if MDEQ has adequate data on your facility (IE – Discharge Monitoring Report from previous permit). To request a waiver for testing, please mark the box in the last column of the parameter.

New Dischargers – Please provide testing data in accordance with NPDES permit.

Effluent Characteristics	Outfall #							
	Parameter	Number of Analyses	Maximum Daily Discharge		Average Daily Discharge		Source	Testing Waiver Requested
			Mass	Conc.	Mass	Conc.		
	Biological Oxygen Demand (BOD)							<input type="checkbox"/>
	Total Suspended Solids (TSS)							<input type="checkbox"/>
	Oil and Grease							<input type="checkbox"/>
	Ammonia (as N)							<input type="checkbox"/>
	Discharge Flow							<input type="checkbox"/>
	pH (report as range)							<input type="checkbox"/>
	Temperature (winter)							<input type="checkbox"/>
	Temperature (summer)							<input type="checkbox"/>
